HYDROGEN DETECTOR CONNECTIONS

Mount Hydrogen Detectors high, as Hydrogen is lighter than air.
 Space the Detectors similar to smoke detectors: 30 feet centers, 900 square feet per detector.
 Relays are dry contact.

TYPICAL CONNECTION OF TWO HD-11 TO AN ALARM CONTROL PANEL

Alarm Control panels that operate on 12 Vdc or 24Vdc are available with many features including battery backup, automatic phone dialers, auxiliary relays.

MULTIPLE HD-12 SYSTEM CONTROLLING A LOW LEVEL EXHAUST FAN AND A HIGH LEVEL ALARM.

NOTE:

1. An alarm control panel similar to the HD-11 system above could be used, with an auxiliary relay to control the fan.
2. The fan relay contacts must be matched to the fan motor power. The HD-12 relay can only switch up 10 VA.
3. Hydrogen detectors mount high like smoke detectors.
4. Match the transformer size, in VA to the total 24 VAC load.
